

A FOTOKEM COMPANY

Services

Keep Me Posted (KMP) is a creative finishing house specializing in episodic television, trailers/promos and commercial finishing. This includes conform, color grading, compositing, effects, title design, graphics, audio mixing, and HD, UHD, 4K and Dolby Vision mastering.

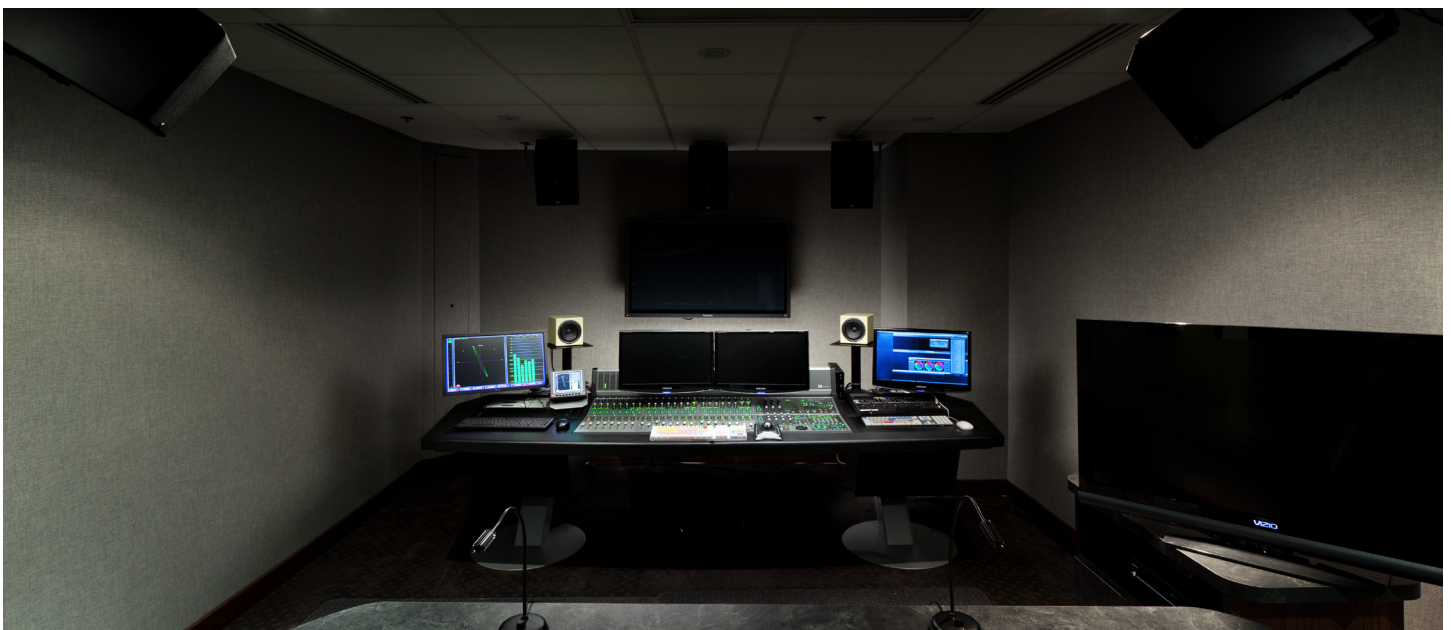

KMP provides powerful on-set color workflows that follow through the finishing process with total accuracy, allowing DP's and Directors to control the look and feel of the show.

Nucoda Color Suite

Dailies systems can be deployed within the productions own editorial environment, decreasing turnaround time and cost while increasing creative control. KMP colorists utilize this technology to enhance communication without having to second-guess creative intent during final color.

In addition to dailies systems, KMP furnishes customized editorial environments and production office space, providing a true end-to-end television post experience.
